Subject: Falcon - Question from the Current Owner Concerning the Dock Area Formerly Owned by NORCO
Date: 08/07/2012 07:55 PM

Gloria, Gary, could you please forward this e-mail to the appropriate person(s) regarding the question about whether the dock area was considered a part of the Site.

The dock area, which was previously owned by NORCO, and I am assuming the same area in question and now owned and operated by the current property owner, was identified as "Area of Concern [AOC] 4, Current Barge Docking Facility" and considered a part of the Site since it was "owned and operated" by NORCO. Soil samples were obtained from this AOC during the Phase I RI and "draft" data tables, previously submitted by NORCO's RI contractor, show that these soil concentrations exceeded RI screening levels (Note that exceedance of screening levels does not necessarily mean that a cleanup or remedial action is required). Our RACs contractor will be evaluating all data submitted by NORCO's RI contractor for usability for the upcoming RI and risk assessments.

Let me know if you need anything else on this issue.
